The Story of a Squad By HENRI BARBUSSE

FRANK MOORE COLRY, in the Bookman for September, 1917, says: "There is much more than the life of a squad in this brilliant and varied narrative which records or divines wide areas of experience." It is not a chronicle, still less a diary, but combines pictures of men in masses, and of individual types, moralizings, impressions, observation episodes, into a sort of epic of army life from the point of view of a private coldier." A thoroughly practical manual of the things to do before the doctor comes and those that will obviate calling him will be found in The Book of Home Nursing, by Frances Campbell (E. P. Dutton & Co.). The modern improvements on the care that mothers used to give before nurses became common will be found here as well as the medicaments that have taken the place of the oldtime family specifics and the directions for first aid. It is a distinctly valuable book, for the author employs sound sense in emergencies and expresses herself in

## FOUR DAYS

By HETTY HEMENWAY

THERE is another "pre paredness" besides that of battleships and great armaments. It is the preparedness of the mind-the clear knowledge of the sacrifices we Americans must make in the War, and the readiness to make them intelligently. This story of how the young manhood of England went to the ordeal makes a pathetic little tale, which contains in its half a hundred pages more soulmoving emotion than one often finds in a long novel.
